About Whaleys Stages

Originally formed in 1869, Whaleys has developed and evolved into one of the leading fabric suppliers in the UK then establishing Whaleys Stage Drapes to manufacture and supply bespoke stage fabrics and accessories.

Whaleys Stage Fabrics specialise in the production of theatre and stage drapes and our experienced manufacturing team is able to produce all manner of imaginative and complex designs.

Whaleys has seen many changes in the industry and has evolved and grown. It is this diversity and foresight that will help us to continue to move forward and lead us into the future always working to source and manufacture new and innovative products.

We have worked with many of the largest and most grand venues in the UK and Europe. Our long-standing production team can assist you through the whole process, offering a much more personable touch to ensure your completed drape or curtain is exactly what is required.

Working with a number of trusted suppliers, our customers can be assured of high-quality products manufactured by experienced staff. Utilising our relationships with our partners we are able to offer a vast range of products including sustainable and ethical alternatives to standard products. If you require something not included in this catalogue, please speak to one of our advisors who will certainly be able to help.

Industries

At Whaleys we provide a wide range of industries with curtain and stage fabric solutions. Some of the specialist sectors we work alongside are:

Lighting & Sound

For all your blackout and masking projects we offer a complete made to measure drape service that incorporates quality workmanship and prompt delivery. All fabrics are flame-proofed to British Standards with full certification provided.

Event & Production

We have a complete range of drapes and backdrops "made to measure" to your individual requirements or should you prefer, our flameproof fabrics can be supplied by the metre. Please phone a member of our qualified staff to discuss your project further.

Theatre & Stage

From Front of House velour, swags and tails to lighting gauzes, cycloramas, blackouts, legs and borders we pride ourselves in delivering a prompt service for all your project needs. Please contact us to discuss your requirements further.

Education & Local Authority

School stages and Halls, Drama Studios, Civic centres and buildings, Art Centres, Village Halls, etc.

With over 50 years of textile experience and expertise working with local authority and the education sector, you can be assured of our full attention at every stage from initial enquiry to completed project.

Wool Serge

Features

100% Wool

Dry Clean
Only

Shade
cards

BS5867 Part 2:B
before wetting

Wool Serge is our biggest range of stocked staging fabric and is also the most popular with our customers. It's versatility makes it a perfect fit for theatrical drapes, borders, legs and skirting. Our Black Wool Serge fabric is available in three different weights and is ideal if you're looking for a fabric that dampens sound or adjusts the acoustic properties of a venue. As Wool Serge is heavier and denser than other fabrics it presents you with a blackout stage solution for touring shows, dressing rooms, theatres, school halls and working clubs.

Acoustic Curtains

Features

Acoustic curtains are specially designed curtains with sound reduction in mind. The woven fibres help to absorb sound, reduce echo and vibration. Ideal for music venues, theatres and large spaces. Acoustic curtains help to stop sound reverberating around the room or venue.

STG13D

Width: 150cm/59"

Bolton Twill Fabrics

Bolton Twill is a style of woven cloth that has a pattern of diagonal ribs. It is often chosen as a fabric for theatrical curtains due to the complex pattern, hiding surface dust and dirt and it is slightly lighter in weight which makes it easier to work with. Available in three different shades from stock with more shades available upon request. We produce each of our Bolton Twill fabrics with a non-durable flame retardant finish.

Supreme Blackout

Features

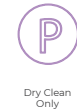

Blackout fabric is commonly used in homes and hotel rooms for curtains and blinds. For theatrical projects, our Supreme Blackout is the perfect material (being opaque and dense) to create a complete blackout when the lights go down, adding to the theatrical experience.

Black
STG345
Width: 150cm/59.1"

Sharkstooth Gauze

Features

Occasionally referred to as Sharkstooth Scrim, it is dense enough for users to be able to paint a scene on, or for it to be used as a surface for projection. Sharkstooth Gauze takes on a solid appearance when light is projected onto the front of the fabric, but when the light moves to behind, it becomes practically transparent.

Scenic Gauze Fabrics

Features

40gm/5qm

Dry Clean Only

Shade cards

BS5867 Part2:B before wetting

Gauze as a fabric has been used in theatres and stages for decades. Scenic Gauze differs to Sharkstooth Gauze slightly as it has a hexagonal weave that is slightly larger than Sharkstooth. As a light-duty net, it can effectively soften the focus of the scenery that's painted behind it and add some depth. On application it can be hung loose or stretched.

Filled Cloth Fabrics

Features

200 - 205gm /sqm

Dry Clean Only

Shade cards

BS5867 Part2:B before wetting

Filled cloth is the industry standard fabric for cyclorama due to its crease resistance and textured surface. The loose weave and width of the cloth allows for seamless finish, which makes it a good alternative to LED technology. Filled cloth is a popular choice for lighting designers due to its light softening properties.

Laser Gauze Fabrics

Features

If you're looking for a showstopping fabric that covers a large surface with a seam free finish then Laser Gauze is the perfect choice. It looks brilliant with light, making it an ideal projection surface for a decorative laser show.

Silver
STG340
Width: 300cm/118"

Scenic Cotton Canvas Fabrics

Features

Cotton Canvas is now one of the most popular fabrics used for paintings and art. Scenic Cotton Canvas is known for its plain weave and lightweight properties. This makes it great for applications that are needing more flexibility. As a smooth drapery it is ideal if you're looking for a textile that can become a scenic backdrop. Available by the metre and in two styles, Natural (loom state) and White (bleached).

STG383

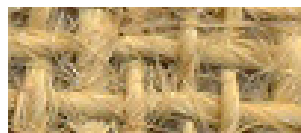

Width: 800cm/315"

Hessian Fabrics

Features

Hessian is a dense, woven eco-friendly fabric, that makes it a perfect solution for sacks and bags, and it also has many other uses within staging. Many artists use Hessian as an alternative to cotton-canvas as a painting surface but the fabric is also ideal for covering set pieces or adding texture to props.

Crushed Velvet Fabrics

Over recent years, crushed velvet fabric has become more popular. As the name suggests, it has a crumpled, visual texture which shimmers when lit, and Whaleys Stages are proud to offer our luxurious crushed velvet range for your theatre and staging needs.

Lame Fabrics

Features

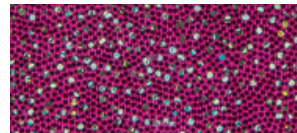

Lame is a striking material which is woven with thin ribbons of metallic yarns. Its glossy finish catches the light, and gives a sense of movement to its application. Today, Lame is more and more commonly used for retro looking theatrical costumes and backdrops. Made from polyester it reflects light brilliantly and is ideal add a touch of glitz and glamour to a stage or theatre venue.

Stage Fabrics

All stage fabric can be used for small and large areas for looks and acoustic qualities. Forward your dimensions for a quotation.

Trevira Polytaf Fabrics

Trevira is a flame retardant fabric used not only for drapes, but for a wide range of purposes across many industries, and as it is the fibre itself within Trevira fabric that is resistant. It is a permanently flame retardant fabric. At Whaleys we have used Trevira fabric for the production of drapes and stage backgrounds in wedding marquees, theatres, arenas and for performance sets for music acts across the UK, Europe and the rest of the world.

Star Cloth

A Star Cloth is a black backdrop curtain made using either fibre optics or LED bulbs to create the effect of stars in the night sky. Usually manufactured out of Black Wool Serge with removable black cotton backing the fibre optic, Star Cloth can be connected to a light source with options of a twinkle wheel and colours. We manufacture both white LED and coloured (RGB) Star Cloths. Both are connected to a stand-alone control box, which in turn can be connected to a DMX control desk.

We have extensive experience delivering the highest quality Star Cloths that help to create the quality of scene effects that you're looking for, so why not challenge us with your project.

Accessories

Alongside offering everything required for your drapery / curtaining, we also have a number of sundries available from stock. If you have anything specific not included here, please do not hesitate to get in touch.

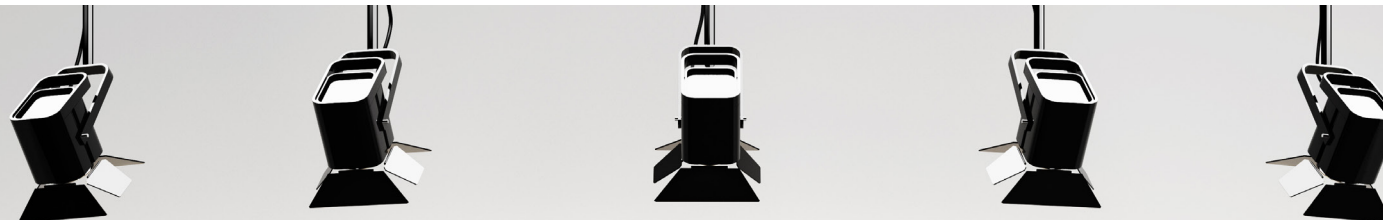

Storage Bags

Storage bags offer a good storage solution for your drapes, keeping them dust free when not in use.

Flameproof Spray

Our flameproof spray is a quick and easy way to ensure your drapes conform to BS5867 Part2:B.

Cotton Webbing

Cotton Webbing comes in 1" and 2" widths in Natural or Black.

Traditional Velcro

We stock hook and loop Velcro in 1 and 2 inch widths in both Black and White. This is generally used when sewn in to attach to another drape.

Adhesive Backed Velcro

This is a quickfire way of attaching a drape with Velcro header to staging. We offer 1 and 2 inch widths of hook and loop adhesive backed Velcro in black or white.

Chain Weight

A chain weight is often used in the base of drapes for helping them to 'hang' properly and pull them to their ideal position, preventing them from bunching up.

Whaleys are one of the UK's leading
manufacturers and suppliers of bespoke stage fabric.
